

## **BASIC LE SNIPER COURSE**

This course provides comprehensive exposure to the roles and responsibilities of the law enforcement sniper. The contemporary nature of this course demands the utmost in dedication from each trainee. Attendees should expect long training days and exposure to the elements, regardless of weather conditions.

Our curriculum includes modules upon: on-demand marksmanship; positional firing; optics; ballistics; environmental factors; range estimation; camouflage; observation techniques; operational planning; tactical communications and much more. Course completion is contingent upon each student passing a final written exam - as well as - a cumulative precision rifle qualification on the final training day. Only ten slots are available for this course to ensure a proper instructor to student ratio.
