LE FIREARMS INSTRUCTOR COURSE

This comprehensive sixty-hour hybrid course will ready participants to not only instruct - but to professionally prepare, develop and conduct relevant firearms training. Course curriculum includes detailed modules for the duty handgun, patrol rifle, diagnostics, coaching, and more. One month prior, registrants will receive distance learning modules and pre-course assignments, prior to attending the five-day in-person training.

Students will be immersed in a full spectrum program, focused upon how to meaningfully deliver practical firearms instruction. Course attendees must also individually deliver classroom presentations, range instruction modules, and technical demonstrations under continual evaluation. Ultimately, each student must pass a written exam and a cumulative firearms qualification on the final day of the course.
